SUMMARY

Java Full Stack Developer with four years of experience in Spring Boot, Angular, Java, and microservices. Proficient in designing, developing, and maintaining scalable applications. Eager to contribute innovative solutions in challenging environments while enhancing skills.

TECHNICAL SKILLS

- Programming Languages: Core Java, Java 8/17 , TypeScript, Python, PL/SQL
- Backend: Spring Boot 3.x, Spring MVC, Spring Data JPA, Spring Security, Microservices, REST APIs
- Frontend: Angular 16+, Angular Material, RxJS, ES6+, Bootstrap
- Database : Oracle SQL, Teradata
- DevOps & Cloud: Docker, Kubernetes, Git, GitHub Actions (CI/CD),
- Testing & Tools: JUnit, Jest , SonarQube, Postman, Swagger, Maven, Intellij, VS Code

WORK EXPERIENCE

Senior Software Engineer, Bahwen Cyber Tek **Feb 2025 - Present**

- Developed and maintained a Java Full Stack application using Java 17, Spring Boot 3, and Angular 18 within a Microservices architecture aligned with Domain-Driven Design (DDD) principles.
- Designed and implemented secure and scalable RESTful APIs, integrating Spring Security with Web SSO authentication, ensuring seamless and secure user access across systems.
- Leveraged Spring Data JPA for efficient database interactions and implemented MapStruct to streamline object mapping, improving code maintainability and reducing boilerplate code by ~30%.
- Built responsive and dynamic UI components using Angular 18, incorporating RxJS for reactive programming and Angular Material UI for consistent and user-friendly design.
- Played a key role in application modernization, successfully migrating legacy systems from Java 8 to Java 17 and Angular 8 to Angular 18, improving performance, security, and maintainability.
- Implemented internationalization (i18n) by adding English language support to an existing French-based application, improving accessibility for a broader user base.
- Developed and optimized CI/CD pipelines using GitLab, integrating SonarQube for automated code quality checks, ensuring adherence to coding standards.

System Engineer, Tata Consultancy Services **Oct 2021 - Feb 2025**

- Designed, developed, and implemented modules for an HR management system. Utilized Spring Boot microservice architecture and Angular framework, following industry best practices and design patterns.
- Implemented RESTful APIs and microservice to facilitate seamless communication between the front-end Angular application and back-end services.
- Utilized expertise in PL/SQL to design and implement customized procedures and functions, addressing specific business requirements and enhancing system functionality.
- Demonstrated proficiency in troubleshooting and resolving production issues, ensuring minimal downtime and uninterrupted operation of critical HR functions.
- Participates in code reviews, unit testing, and debugging activities to ensure code quality and maintainability.

EDUCATION

2021 - 2023 | University Of Mumbai

Master in Computer Science - Post Graduate Degree
CGPA - 8.75

2018 - 2021 | University Of Mumbai

Bachelor of Computer Science - Graduate Degree
CGPA - 8.53

PROJECT

ATS Resume Matcher

Built an ATS-based Resume Scoring tool that analyzes resumes using job descriptions and skills to generate a matching score.

Employee Management Application

Developed a Employee management system using Angular and Sprint boot

ACHIEVEMENT

Jan - 2025 | Elevate Wings Award

Achieved Distinction in TCS internal certification exam Elevate Wings, demonstrating strong technical proficiency and problem-solving skills View

Dec - 2022 | On the Spot Award

Acknowledged for solving critical production bug within the timeline. View
